LEKE VR PROFILE

LEKE VR is committed to promoting the overall development of the VR industry and helping the upgrading of the VR game center industry

LEKE VR, focusing on VR, AR, MR, AI and other scientific technologies, is a high-tech enterprise integrating software and hardware research and development, content customization, design and construction, production and sales and marketing services. Since its establishment, LEKE VR has obtained institutional investment from the top domestic investment institutions such as Saifu Capital and Hejun Capital, as well as strategic investment from domestic listed companies such as Zhangqu Technology and Palm.

LEKE VR CULTURE

Mission

To Bring Joy To The Masses And Create Value For Customers.

Vision

Strive to become a great company in the era of virtual reality.

Core Values

Achieve for customers, achieve for oneself;
Quality reigns supreme, strive for excellence;
Continuous innovation, relentless effort;
Sincere and trustworthy, words must be followed by actions;
Courage to take responsibility, determination to be a pioneer;
A united team, one goal, together we strive, together we succeed.

LEKE VR in the world

600+
Global stores

700000000+
Cumulative Consumers

700+
Quality Contents

LEKE VR has served more than 70 million users worldwide. Our company's products have been exported to dozens of countries and regions such as UK, USA, Japan, Germany, Dubai, Saudi Arabia, Australia, Vietnam, Singapore. Among the countries, LEKE VR has authorized national agents in the US, UK, Japan, Saudi Arabia, Germany and other European regions. We are looking for a global partner now.

LEKE VR HISTORY

2024.12

LEKE VR first large-scale VR theme park in the world was established in Beijing, covering an area of 1,500 square meters. It includes VR, XR, and MR equipment, including the latest large-space equipment X-SPACE 2.0, MR Go Kart, Arc Display Flying Cinema, and VR dynamic equipment.

2022.12

In December 2022, LEKE VR completed a round B financing of nearly 100 million yuan. At the same time, the number of global chain stores exceeded 700+.

2021.12

In December 2021, the number of domestic franchise stores exceeded 200, and Leke VR officially entered the era of brand franchise mode.

2020.08

Leke VR won the "VR Leading Enterprise Award" again, won the recognition of the industry authority, and continued to maintain the leading position in the industry.

2019.09

LEKE VR launched a franchise mode to find partners around the world. At the same time, the independently developed big data location analysis system was released to help the development of VR industry.

2019.05

LEKE VR has won industry awards, such as the "Asian VR Enterprise Leading Award", "China's Outstanding VR Equipment Supplier", "Ten Influential VR Enterprise Brands in Asia", which has been praised by industry professionals.

2016.05

LEKE VR has won 25 million A+ rounds of investment from the domestic game listed company Zhangqu Technology, the domestic eco-town listed company Palm, and Hejun Capital.

2016.01

LEKE VR has won the A-round investment of tens of millions of RMB invested by Saifu Leading Investment, Western Capital, Hejun Capital, Zero2IPO Venture Capital and Jiuhe Venture Capital

2015.07

LEKE VR has received millions of angel rounds from Hejun Capital

2015.03

LEKE VR was founded in Zhongguancun, Beijing. With the purpose of creating happiness, LEKE VR was the first one launched the virtual reality entertainment solution with real commercial application value.

PROJECT INTRODUCTION

In combination with the current development status of VR entertainment experience stores, and to create sustainable profitable projects for customers, LEKE VR launched a new VR project cooperation mode - franchise mode. The franchise mode is invested by the project investors. The LEKE VR is responsible for technology research and development, equipment production, system upgrade and maintenance, and game update, and jointly operates VR experience stores. Provide integrated operation service mode from project site selection, opening preparation, employee training-marketing planning, game update and system upgrade.

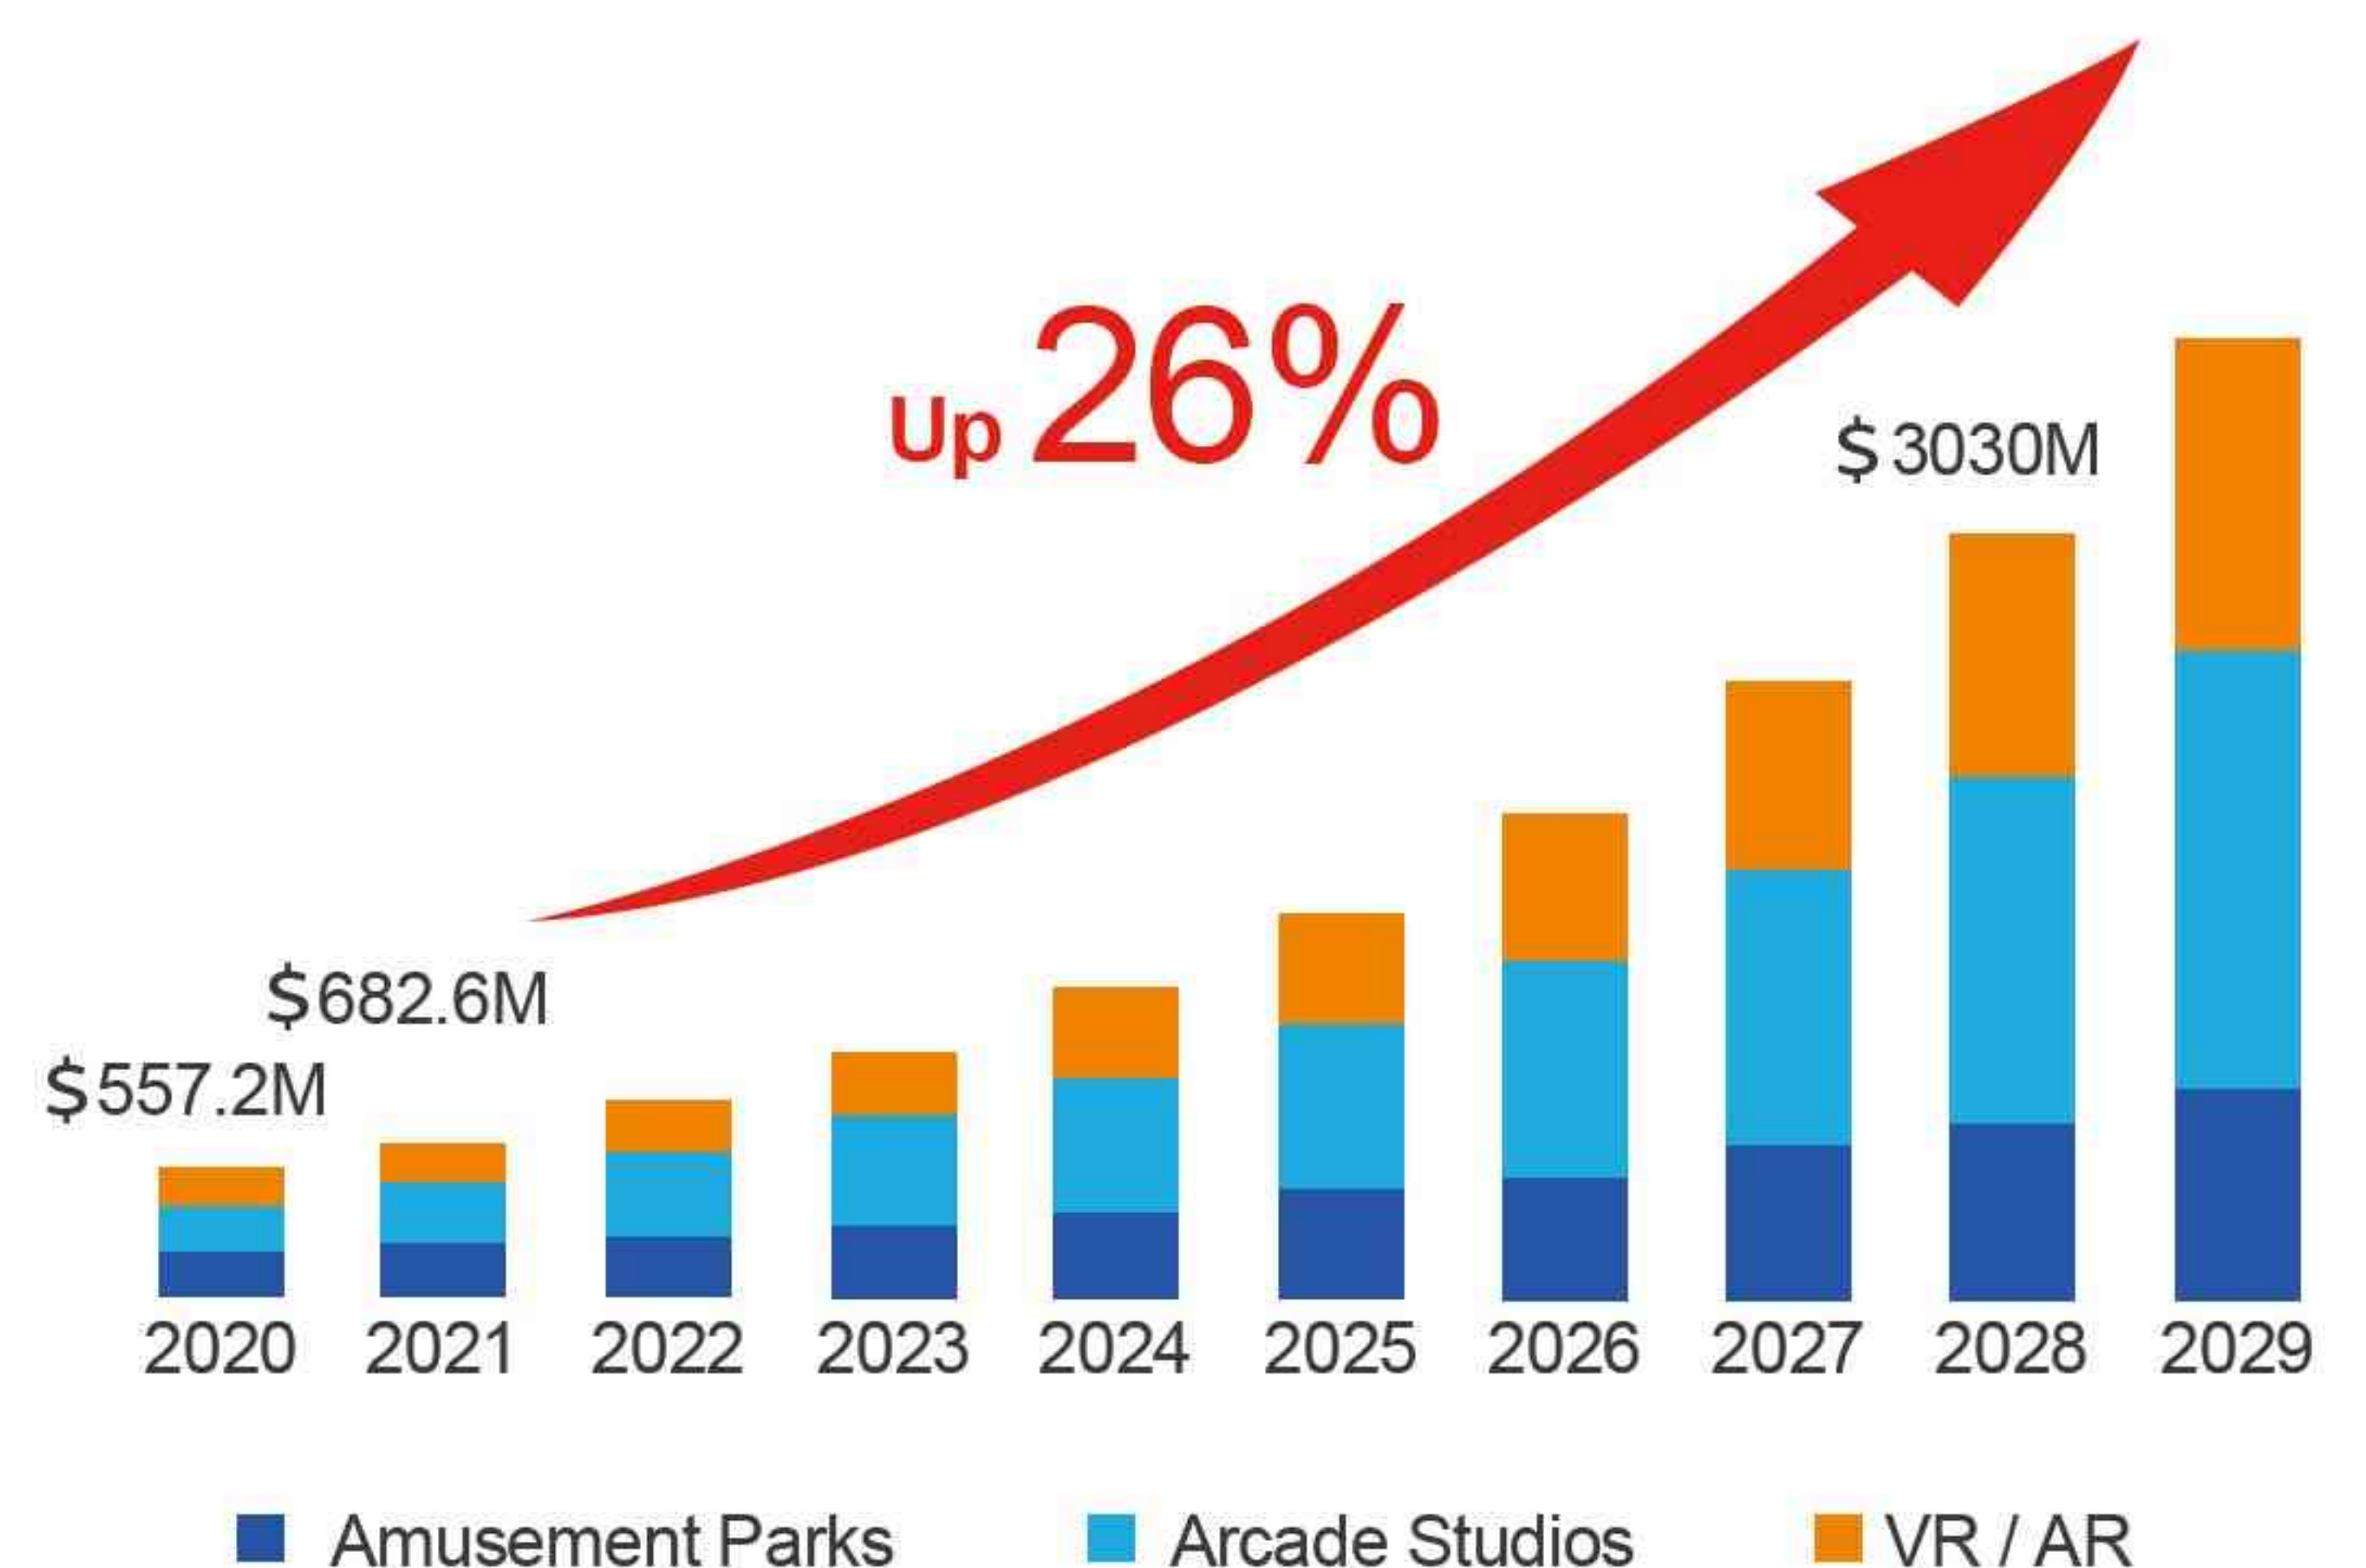

The franchise mode adheres to the concept of "risk sharing and benefit sharing" and aims at low risk, high return and continuous profit. The franchise mode of LEKE VR is different from the traditional VR experience store, with four characteristics of innovation, low risk, sustainability and development.

VR MARKET PROSPECT

In 2019, the global virtual reality market scale exceeded 120 billion yuan, up 70% year on year. Among them, the overall VR market is more than 90 billion yuan, and the overall AR market is more than 30 billion yuan. It is estimated that the global virtual reality industry scale will exceed 200 billion yuan in 2020, including 160 billion yuan for VR market and 45 billion yuan for AR market. It is estimated that the annual composite growth rate of the global virtual reality industry scale will exceed 70% in 2017-2022, with VR taking the dominant position and AR growing significantly. From the perspective of industrial structure, the content application market has grown rapidly, with the entertainment market taking the first place.

Metaverse entertainment space development solution

We provide you with a professional one-stop development solution.

Different from the development model of traditional VR experience centers, LEKE VR launches a tailored metaverse entertainment space development solution.

Focus on the concept of "suitable for all ages and positioned for diverse groups", it covers four core scenarios: entertainment & competition, family activities, popular science education, and team building events. This creates an immersive experience benchmark that combines fun, professionalism, and innovation.

The metaverse entertainment space model breaks away from the single entertainment nature of traditional VR, serving both individual consumers (B2C) and group clients (B2B).

It achieves the dual goals of influencer driven traffic with sustainable long-term operation, promoting the in-depth integration of cultural communication and the digital entertainment industry.

Core advantages of the metaverse entertainment space model.

This model focuses on the metaverse entertainment model creating a comprehensive immersive entertainment space integrating VR, MR, AR, and cinema. With MR go kart, MR CS, and X-Space 3.0 as core signature projects, we create differentiated competitive advantages through cutting-edge technologies.

Supported by a rich mix of leisure facilities including VR equipment, pinball machines, AR shooting games, claw machines and more, the space efficiently diversifies consumer groups and enriches experience scenarios. Targeting core users aged 8–35, it satisfies diverse demands for leisure, social interaction and trendy experiences, establishing a professional and engaging benchmark for metaverse entertainment.

1 Diversified entertainment formats
Including VR, AR, MR, arcade games and more.

2 Advanced technology
Utilizes the latest technologies.

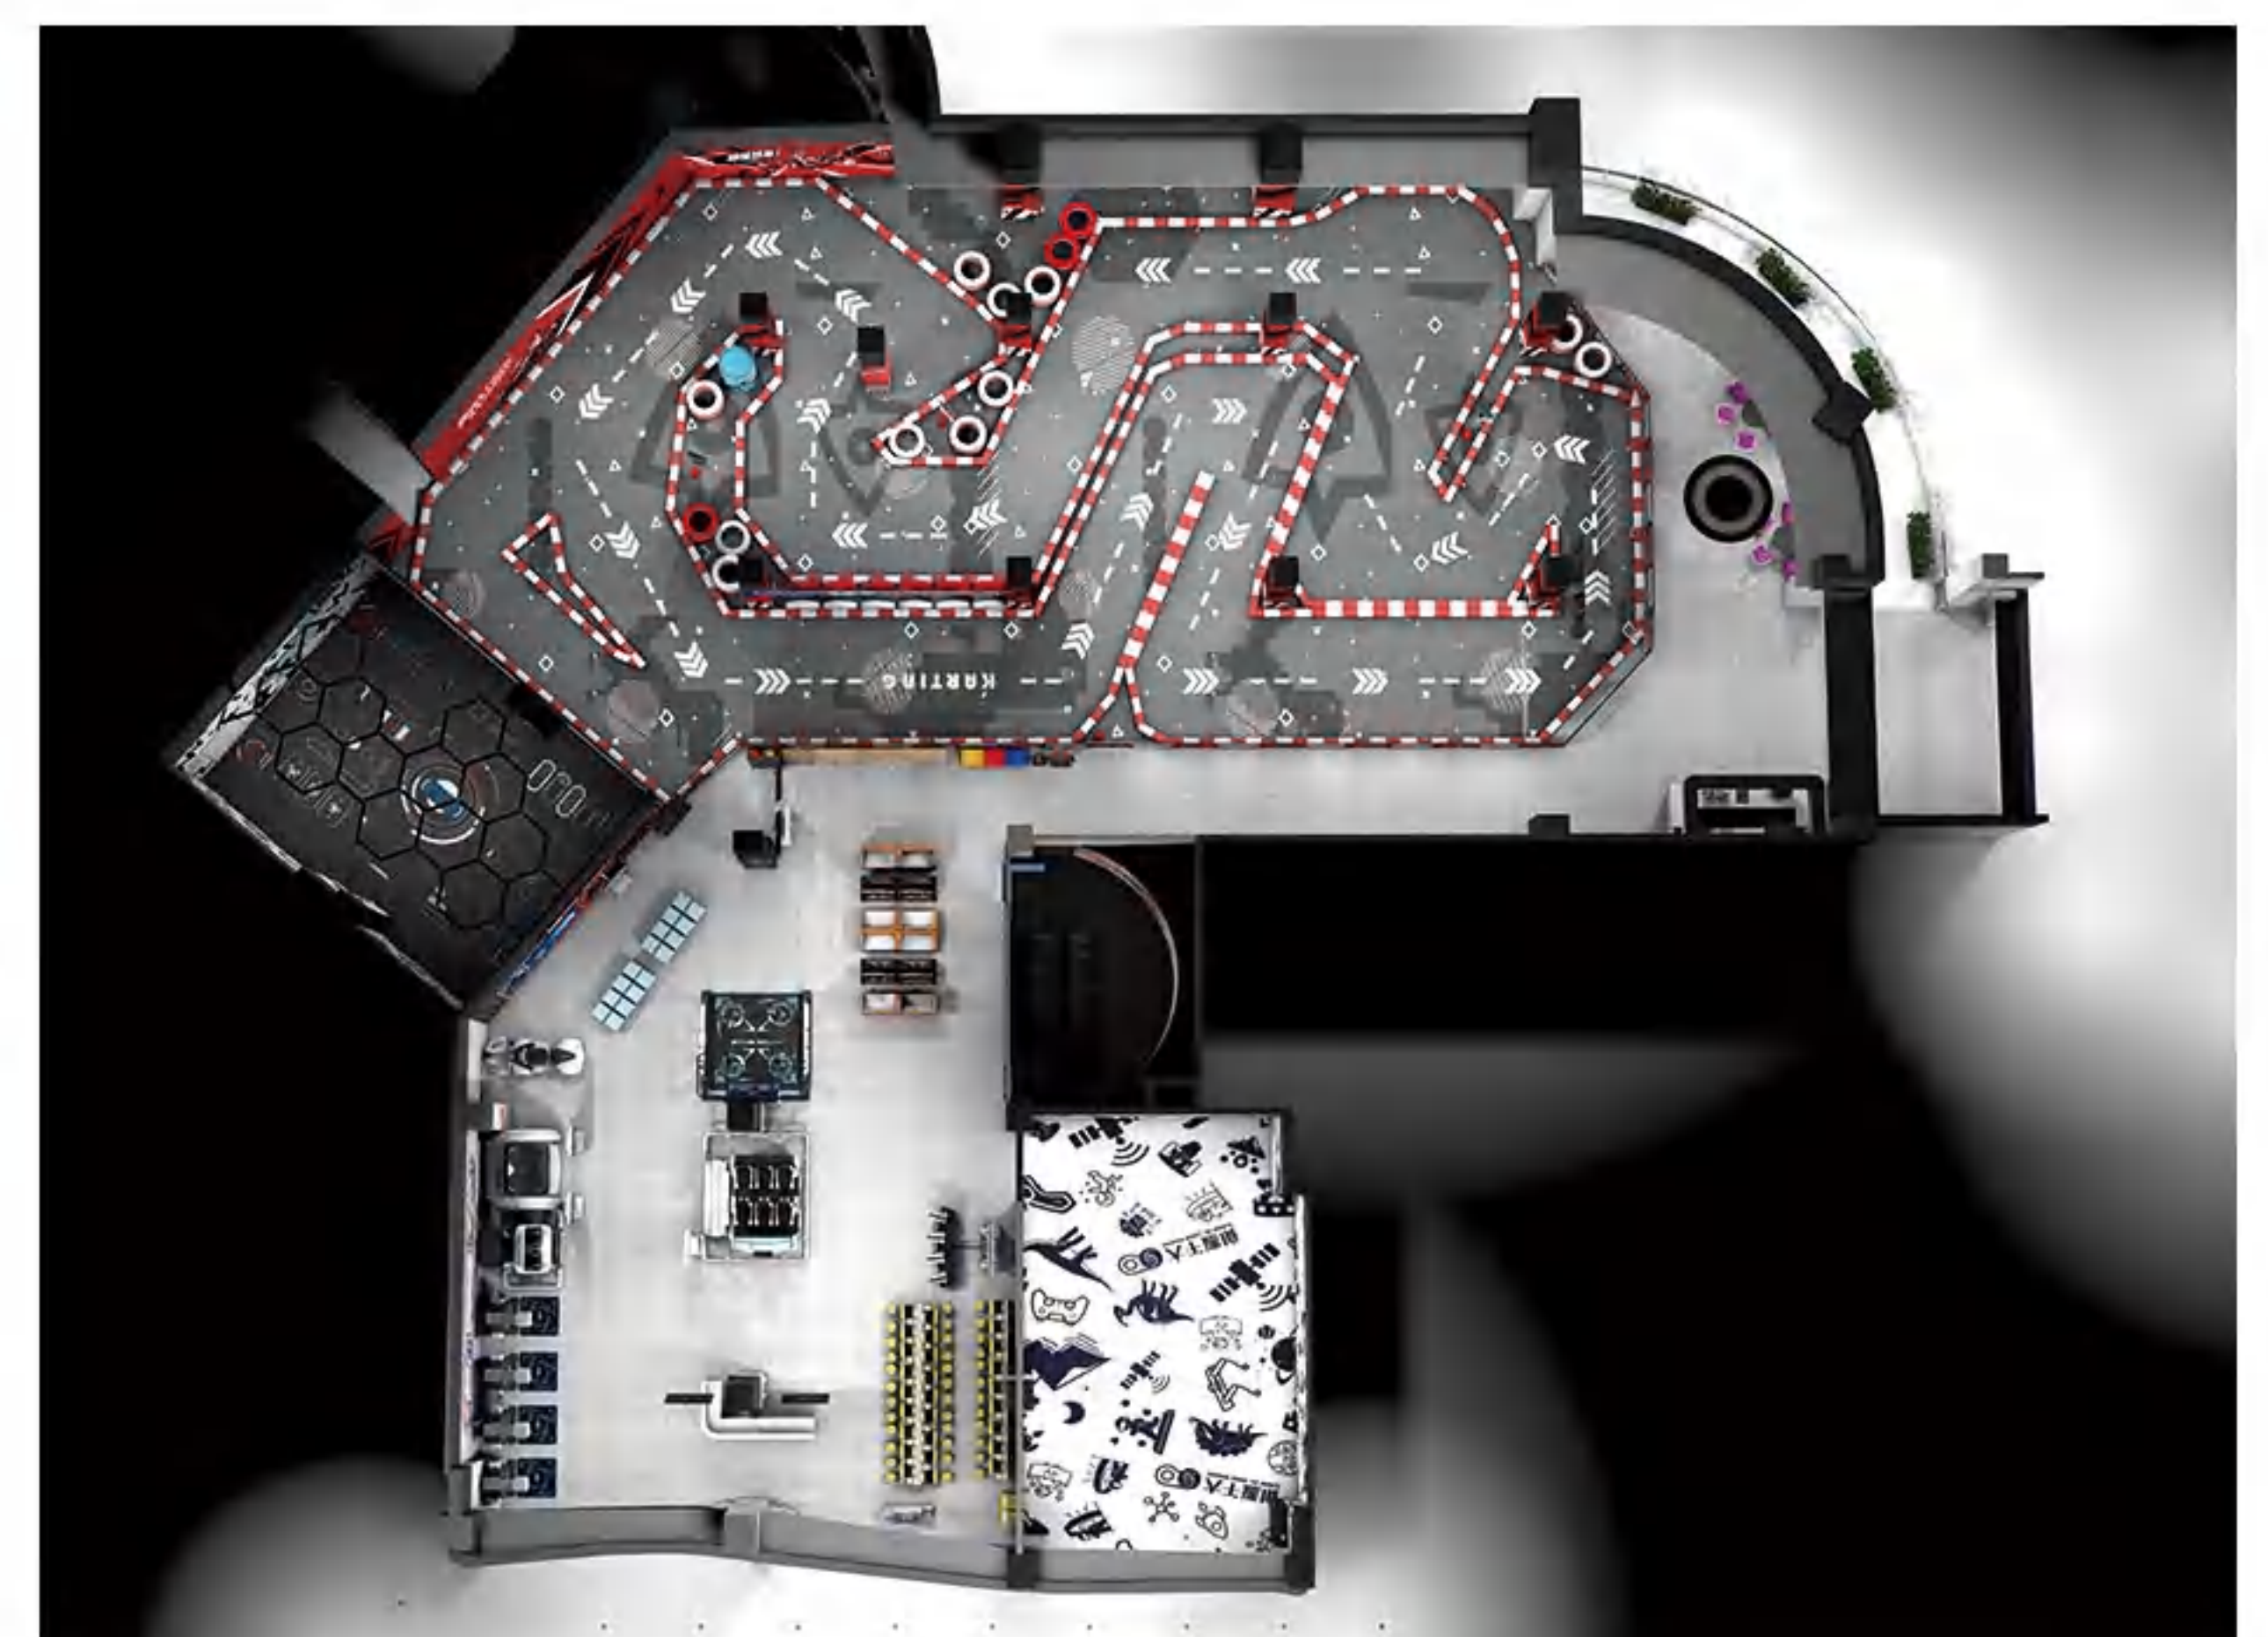

3 Diverse content
Continuous content updates

4 Easy operation
Intelligent management system

VR Motion Editor action editing software

**The first VR motion editing software in the world,
setting industry standards**

With reference to the excellent operation functions of professional editing software such as Maya, AfterEffects, Premiere, Nuendo, etc., Leke independently developed the world's first VR platform action recording and editing software. The software uses high-precision recording software to record, and the powerful action curve editor realizes the accurate acquisition and editing processing of the film on the seat motion in the unit of each frame. Using the excellent multi-track data fusion algorithm accumulated by Leke for many years, each detail of the film is individually adapted.
